

## Iceni Diagnostics, Norwich

Iceni Diagnostics was founded in 2014 to develop carbohydrate-based therapeutics and point-of-care diagnostics for infectious diseases. The company provides contract research services for governmental agencies and other companies. In addition, Iceni Diagnostics is independently developing simple, yet rapid diagnostic tests for infectious diseases. On-going projects include the development of a diagnostic test for norovirus for patient care in hospitals and a test for the on-farm detection of avian influenza.
